

SHUBHADA KAMBLI

Environmental Scientist

US EPA (New England)

Shubhada Kambli is an environmental scientist with the US Environmental Protection Agency's Region One (New England) energy team. She received a joint master's of science degree from Tufts University in both Civil and Environmental Engineering, and Urban Planning. Passionate about social entrepreneurship, she created a fuel cell education program for Boston schools as an AmeriCorps member, and founded a socially-responsible consulting firm during grad school. Her current work involves expanding grassroots energy efficiency efforts in municipalities across New England through the EPA's Community Energy Challenge.
